## Product Advisory

PUNCH Bass Remote

Para-Punch Remote

The current Punch Bass and Para-Punch Remote will still be available and work with most 2004 to 2007 Rockford Fosgate amplifiers, except the new 2007 Power models as shown below.

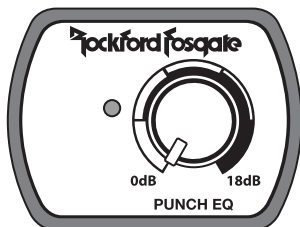

**VS.**

# PEQ

PUNCH EQ

Rockford Fosgate continues to be innovative and bring new features to their products that our consumers are requesting. The new PEQ brings a greater versatility to our new amplifier design. The PEQ will boost Bass on the bd Mono amplifiers and boost the Bass and/or Treble on the 2-Channel and 4-Channel\* amplifiers.

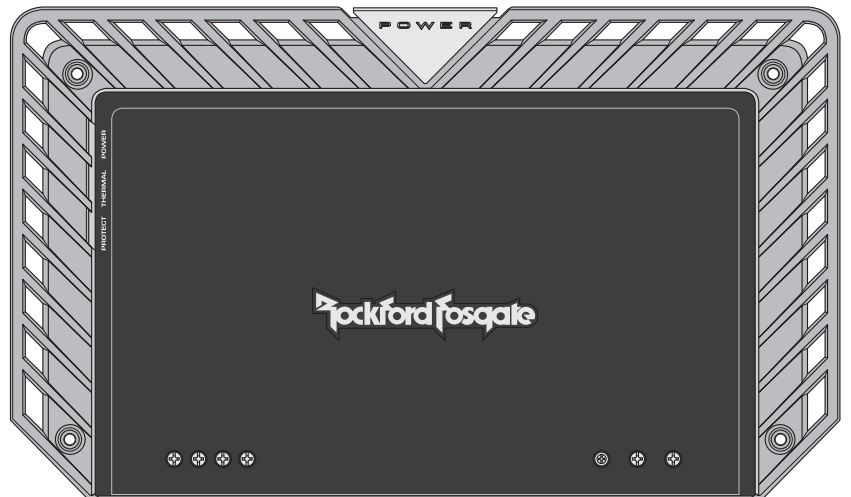

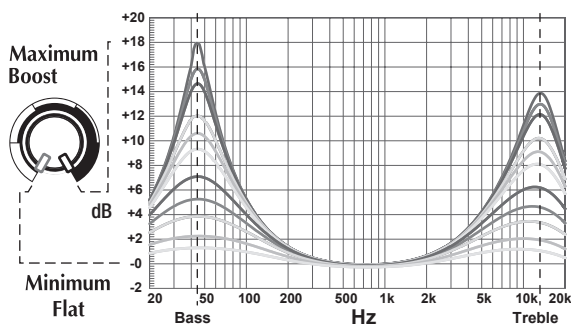

\*On the 4-Channel amplifiers, the PEQ controls only the rear channels.

# PEQ

Patent Pending

The Punch EQ (PEQ) **only** works with POWER amplifiers with the body style shown below.

### BASS BOOST

Variable from 0dB to +18dB @ 45Hz

### MID-BASS and TREBLE BOOST

Variable from 0dB to +12dB @ 12KHz

**No damage will occur if you use the wrong remote with any amplifier.  
The remote just wont function.**
