

1998 & Newer Harley-Davidson® Road King® TM400X4ad Amplifier Tuning

RFBTRCA
Bluetooth® Interface

REMOTE TURN-ON REQUIRED
use turn-on from underseat adaptor

REAR INPUT LEVEL: 03:00
Matches rear amp input from
Bluetooth® interface.

FRONT INPUT LEVEL: 03:00
Matches front amp input from
Bluetooth® interface.

FRONT & REAR EQUALIZER: MIN
Adds bass & treble to
enclosed vehicles.
Not used on motorcycles.

INPUT SWITCH: 2CH
Number of inputs to feed amp.
Bluetooth® interface feeds
all four channels.

CROSSOVER FREQUENCY: 80Hz
Tells amp what frequencies to pass. Used
as a “bass blocker” to prevent low
frequencies from damaging speakers.
(works with HP/AP/LP switch)

CROSSOVER SWITCH: HP (High-Pass)
Type of crossover needed.
(works with crossover frequency dial)

[HP (High-Pass) allows frequencies above to pass]
[AP (All-Pass) allows all frequencies to pass]
[LP (Low-Pass) allows frequencies below to pass]

1998 & Newer Harley-Davidson® Road King® Bluetooth® Audio Pairing

BLUETOOTH DISCOVERY MODE:

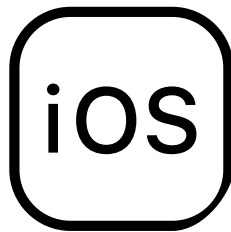

1. PRESS & HOLD Bluetooth button for approximately 5 seconds while simultaneously turning-on motorcycle ignition to ACCESSORY.
2. Bluetooth module will audibly chime and 2 outer LEDs will begin to alternately flash.
3. Bluetooth module is now in DISCOVERY MODE.

PAIRING ON YOUR MOBILE DEVICE

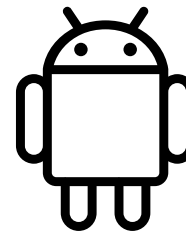

REDUCE VOLUME:

1. Reduce music volume on mobile device.

APPLE iOS:

1. Go to SETTINGS > BLUETOOTH.
2. Select RFBTRCA.
3. Once pairing is complete, you will hear audible chime and all 3 LEDs will illuminate solid.

ANDROID:

1. Go to SETTINGS > CONNECTED DEVICES > BLUETOOTH.
2. Select PAIR NEW DEVICE.
3. Select RFBTRCA.
4. Choose ALLOW TO PAIR.
5. Once pairing is complete, you will hear audible chime and all 3 LEDs will illuminate solid.
